Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Applicants have claimed a wrinkle reducing composition comprising a polyhydric alcohol humectant, selected surfactants, selected additives, and an aqueous carrier. The closest prior art of Vogel et al, US 5,532,023 teaches a wrinkle reducing composition for use on fabrics (see abstract). The liquid carrier of the invention is an aqueous system comprising water and may contain organic solvents such as polyhydric alcohols and alkylene glycols (col. 12, lines 55-67). Antistatic agents such as choline esters may be added to these compositions (col. 11, lines 17-48). Suitable ethoxylated surfactants of the invention include alkyl ether sulfates (col. 8, lines 41-62) and ethoxylated quaternary ammonium surfactants (col. 9, lines 29-35). Applicants have argued that though Vogel et al generically teach the components of the present claims as optional ingredients, it would not have been obvious to one of ordinary skill in the art to pick and choose from the optional components of Vogel et al and arrive at applicants' invention. This argument has been found to be persuasive. Accordingly, the present claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
